

# A Film Hub

Looking for a prime location to film your next production? Look no further than Barbados!

Barbados' film industry has developed steadily over the years, with a number of film production studios on the island and those providing television and advertising production services.

The jurisdiction's scenic location is a huge draw for filmmakers. Several local and international films have been produced in Barbados including the 1957 movie *Island in the Sun*. Barbados was the location of choice in the 1990s, for episodes of soap opera *The Bold and*

*the Beautiful*, as well as the more recent and popular international television series *Outer Banks*.

Local productions include movies such as *Hit for Six*, *Hush 1, 2 & 3*, *Chrissy*, *Pay Day*, *Into the Darkness* and *Camouflage*, which gained international appeal, premiering in the UK in early 2024. Popular television series and comedy, *Keeping up with the Joneses*, was also filmed in Barbados.
